Industry Overview

Bangladesh's printing industry is at a transformative stage, driven by the country's expanding textile, apparel, packaging, retail, and e-commerce sectors. With an estimated market size of around Tk 4,000 crore (\approx USD 460 million) and approximately 7,000 printing houses, the sector is gradually modernizing, adopting advanced technologies, and moving toward high-value segments. Textile printing, including screen, rotary, digital, and sublimation methods, remains the largest segment, fueled by the country's booming apparel export market. Screen printing continues to serve textiles, signage, and promotional products, while digital printing is expanding rapidly in commercial, packaging, and textile applications, reflecting a CAGR of around 11%.

Label printing, used extensively in FMCG, pharmaceutical, and packaging industries, is growing at a CAGR of 12–13%.

Bangladesh's printing industry offers a dynamic and growing market with opportunities across textile printing, digital printing, labeling, signage, finishing, and emerging 3D applications. With rapid modernization and demand for advanced technologies, the sector is poised for growth, making the **9th Print Tech Bangladesh (24–26 September 2026, ICCB Dhaka)** the ideal platform for global suppliers, industry leaders, and innovators to explore, collaborate, and invest in the country's fastest-evolving printing ecosystem.
